FULLSTACK SOFTWARE ENGINEER

- Fullstack software engineer with experience building and maintaining production systems using Ruby on Rails, React, Node.js, MySQL, and AWS infrastructure.
- Currently working at CreditON while independently building Servo, a marketplace platform for service providers in Uruguay.
- Interested in product development, automation systems, scalable software, and startup environments.

WORK EXPERIENCE

CreditON • 02/2024 - Present

Fullstack Developer

- Develop and maintain production features using Ruby on Rails, JavaScript, and MySQL.
- Implement new functionalities, system improvements, and bug fixes for internal financial systems.
- Manage infrastructure-related tasks involving AWS EC2, Linux environments, PM2, and NGINX.
- Collaborate on performance optimization and backend maintenance.
- Work closely with production systems and operational workflows.

EDUCATION

Bachelor's in Computer Science

Universidad ORT Uruguay • 01/2023 - Present

PROJECTS

Founder & Fullstack Developer — Servo • 01/2024 - Present

- Building a fullstack marketplace platform that connects clients with service providers across Uruguay.
- Developed the frontend using React and the backend using Node.js and MySQL.
- Designed and managed cloud infrastructure using AWS EC2, AWS RDS, NGINX, and PM2.
- Responsible for product architecture, deployment pipelines, user experience, and platform scalability.
- Built authentication systems, provider profiles, service management tools, and search functionality from scratch.

AI Content Automation Systems

- Built automated workflows for AI-generated storytelling and content creation systems.
- Worked with prompt engineering, automation pipelines, rendering workflows, and image generation systems.

SKILLS

Frontend

- HTML & CSS
- JavaScript
- React

Backend

- MySQL
- Node.js
- Ruby on Rails

Infrastructure

- AWS EC2 & RDS
- Linux/macOS Terminal
- NGINX
- PM2

Tools

- Git & GitHub
